NOTE:

The zonal categorisation is meant for registration purposes and to widen the membership of the association. It is aimed at giving each member a **unique identity code** that would serve as the **ATAG REGISTRATION NUMBER**. From the table, each region has a code which represents the short name of the region. For example, Ashanti has the code **AS** while Volta has the code **VO**. The regional code would be the prefix for a member's identity number, followed by the year of registration, month of registration, zonal code, and reference number in a zone respectively.

For example:
